CONFERENCE

**The USB 2.0 socket allows you to connect the Microphone to a free USB port and to configure itself automatically.
It is compatible with windows and Mac.**

USB DESK MICROPHONE WITH DOUBLE CAPSULE FOR 360° RECEPTION

• **A 360 ° OMNIDIRECTIONAL MICROPHONE SYSTEM** in a practical and elegant metal chassis.
It is ideal for conferences so that you can hear the voice of all participants at a meeting table, but it can also be used for video conferences with Skype, Zoom, Meet and all the less common programs.
The audio filter will give a clear and precise voice.
Inside the spherical casing there are **TWO small microphones (heads) with a reception range up to 180°**.
The two microphones are installed opposite each other in order to ensure 360 ° reception up to over 3m away.
• **EASY AND COMPATIBLE.** Just connect the microphone to a free USB port to make it work!
No external power supply is required, the power is supplied from the USB socket itself.
There are no drivers to install for the DESK-360 to operate. It is compatible with the most common operating systems such as Mac OS / Windows / Linux, consequently with any brand of computer (eg. Apple, Sony, Asus, HP, Acer, etc.).
The sturdy metal tripod holder can be folded for easy transport.
